Suicide Risk Response

**Scope (Staff):** Community health

**Scope (Area):** CAHS-CH, WACHS

**Child Safe Organisation Statement of Commitment**
CAHS commits to being a child safe organisation by applying the National Principles for Child Safe Organisations. This is a commitment to a strong culture supported by robust policies and procedures to reduce the likelihood of harm to children and young people.

**Aim**
To safeguard young people when responding to concerns about suicide risk.

**Risk**
Young people identified as being at risk of suicide are not provided appropriate assessment, support and referral.

**Background**
Suicide is the leading cause of death for Australian children between the ages of five and 17 years of age.\(^1\) Across all demographic regions of WA, the suicide rate for Aboriginal and Torres Strait Islander people (all groups) is almost three times higher than non-Aboriginal people.\(^2\) Other at-risk populations are those who live in rural and remote locations, lesbian, gay, bisexual, transgender and gender diverse, intersex and questioning (LGBTIQ) people.

This protocol focuses on responses to suicide risk, but recognises that while mental health concerns increase risk of suicidality, not all individuals who experience mental health concerns will be at risk of suicide.\(^3\) Many suicides happen impulsively in moments of crisis due to dyscopia with life stressors.\(^4\)

**Definitions**

**Imminent Risk:** suggests a crisis or urgency which requires constant supervision and immediate action.\(^5\)
Nominated person: is used in this document to refer to school-based staff member/s who need to be informed when there is a concern. This will vary from school to school but could include, for example, the principal, deputy principal, student services or other support staff.

Non-suicidal self-injury (NSSI): engaging in a deliberate act to harm or self-injure oneself without the intent to die, although suicide is not the intention of NSSI, there is an independent association between NSSI and increased suicide risk.

Postvention: Activities or interventions which occur after a death by suicide, aimed to support and assist those bereaved or affected to recover from trauma, cope with additional stressors and to manage the experience of loss and grief.

Protective Factors: are those which reduce the likelihood for suicidal behaviour.

Risk factors: are defined in the context of suicide as variables that are associated with an increased likelihood that a suicide will occur.

Department of Education (DoE) Risk management plan: identifies foreseeable circumstances where a student may be at risk of harm and outlines strategies to reduce this risk.

Risk to others: includes harassment; stalking or predatory intent; violence and aggression; property damage; and public nuisance and reckless behaviour that endangers others.

Risk to self: includes self-harm, suicide and attempted suicide, repetitive self-injury; self-neglect.

Suicidal Behaviours: engaging in actions that have the potential to lead to suicide. Encompasses ideations (e.g. thoughts), communications (e.g. threats and/or plans), behaviours (e.g. potentially injurious actions).

Suicide: A death resulting from an act of self-harm with the intention of ending one’s own life.

Safe language to use when talking about suicide:
- ‘non-fatal’ or ‘made an attempt on his/her life’ (avoid using ‘unsuccessful or failed suicide’)
- ‘took their life’ or ‘ended their own life’ (avoid using ‘successful suicide’)
- ‘died by suicide’, ‘suicided’ or ‘death by suicide’ (avoid using ‘committed’ or ‘commit suicide’)
- ‘concerning rates of suicide’ or ‘number of deaths’ (avoid ‘suicide epidemic’)
- ‘person who has died by suicide’ or ‘person who has experienced a suicide attempt’ (avoid ‘suicide victim’ or ‘suicide attempter’)
Key points

- Nurses must work within their scope of practice.
- This document should be read in conjunction with the Department of Education (DoE) School response and planning guidelines for students with suicidal behaviour and non-suicidal self-injury.
- This document does not address actions following a suspected suicide. In this instance the school has the responsibility for initiating postvention initiatives. The DoE School response and planning guidelines for students with suicidal behaviour and non-suicidal self-injury provides more detail regarding postvention.
- At no time can staff maintain absolute confidentiality when a young person has disclosed suicidal behaviour or NSSI. Specific information may be shared between agencies to ensure the young person’s safety and wellbeing and to avert the risk. When a nurse forms a belief that a young person may be suicidal, the nurse must ask directly “Are you thinking of killing yourself?”
- Suicidal ideation is complex and changeable. Nurses must consider that risk is fluid and can change over very short timeframes. It is important to note that not all suicidal ideation is associated with suicidal behaviour but is a risk factor for future suicidal behaviour.
- Whilst some risk factors are long-term or stable and give an indication of an individual’s capacity to self-harm, other risk factors may be short-term or dynamic.
- All nurses will refer to the Nursing and Midwifery Board AHPRA Decision-making framework in relation to scope of practice and delegation of care to ensure that decision-making is consistent, safe, person-centred and evidence-based.
- For young people experiencing acute deterioration in mental state who require immediate attention, phone 000 for emergency assistance.
- The steps of the Suicide Risk Response protocol are outlined in the flowchart in Appendix A.
- DoE staff develop individual Risk Management Plans (RMPs) following a young person’s disclosure of suicidal behaviour or non-suicidal self-injury (NSSI). RMPs outline strategies to reduce the potential risk of harm for the young person while the young person is at school. DoE are responsible for communicating and updating RMPs as per the DoE School response and planning guidelines for students with suicidal behaviour and non-suicidal self-injury.
- Nurses should attend student services meetings to identify adolescents at risk (including those with identified suicide/NSSI risk), or request to be informed of outcomes of these meetings, as per the School-aged health services – secondary guideline.
Nurses require appropriate knowledge and skills that are specific to their nursing role. Refer to CAHS-CH and WACHS Practice/Learning Frameworks for further details.

**Process**

<table>
<thead>
<tr>
<th>Steps</th>
<th>Additional Information</th>
</tr>
</thead>
</table>
| **1. Be aware of school processes** | - Appropriate training in suicide risk assessment includes Gatekeeper Suicide Prevention or equivalent. Staff working in DoE schools who may have received appropriate training include nurses, school psychologists, student services staff, deputy or chaplains.  
- See DoE policies at the end of this document in *Useful external resources*.  
- Refer to local/regional guidelines as relevant to guide the assessment, management and referral for suicidal behaviour. |
| - Identify school processes for responding to disclosures of suicidal behaviour and NSSI.  
- Identify school staff that have recency of appropriate training in suicide risk assessment.  
- Identify local referral options and resources.  
- If appropriate, identify staff member/s who may be able to provide cultural consultation or support to Aboriginal young people at the school. | |
| **2. Consultation with young person in which suicidal ideation is disclosed** | - In collaboration with DoE staff, ensure the young person is supervised and keep them safe until appropriate care can be provided.  
- Information related to risk of suicide needs to be shared to keep young people safe. Other information, not relevant to risk, may remain confidential.\(^9\)  
- If the nurse has received Gatekeeper training and conducts the suicide risk assessment, they should discuss assessment findings with a colleague/line manager and/or DoE staff trained in Gatekeeper and formulate a plan of actions.  
- If not Gatekeeper trained, nurses should ensure the care of the young person is transferred to an appropriately trained professional immediately. A clinical handover is required (CHS663). |
| - Ensure adult supervision of the young person, they must not be left alone.  
- Restrict access to any suicide method.  
- Inform the school (Principal or nominated staff member) you are with a student who has expressed suicidal ideation.  
- Advise the Principal or nominated staff member that a risk assessment by someone with appropriate training needs to be immediately considered.  
  - If a Gatekeeper trained professional is not available onsite, request an external provider (e.g. CAMHS Emergency Telehealth Service) be contacted to provide assessment.  
  - If the assessment cannot occur |
### Steps

- before the end of the school day, inform the parent/caregiver to arrange alternative assessment outside the school through the General Practitioner (GP) or hospital Emergency Department.

- Support implementation of any existing RMP, as required.

- Involve others as appropriate, e.g. nominated school staff member as outlined in an existing RMP.

- Following disclosure, nurse or DoE staff to contact parent/caregiver to inform them of the suicide risk and discuss actions and referral options.
  - If parent/caregiver cannot be contacted or does not engage, advise the principal or their delegate and clinical nurse manager to seek further guidance.

### Additional Information

**3. Referral**

**Imminent risk**

- Immediate referral is required. Referral details are to be clearly communicated to the parent/caregiver, including, where possible, a written clinical handover. Contact details for local emergency services are to be clearly noted.
  - Adherence to CAHS-CH and WACHS clinical handover processes are required when handing over, or referring a young person within, or outside of, the health service.

- Where appropriate (and time allows), contact local hospital/GP or client’s existing provider of health care to advise a young person is coming in and provide the young person’s details.

**Immediate referral options:**

**CAHS-CH:**

- Emergency response procedures or 000
- Child and Adolescent Mental Health Service Emergency Telehealth Service (CAMHS ETS) for 18 years and under (1800 048 636). 0800-1430hrs 7 days a week.
- Youth Inpatient unit Fiona Stanley Hospital provides statewide support for 16-24 with acute mental health concerns referral made through local community health or hospital services.
- East Metropolitan Youth Unit provides services for young people aged 16-24 years of age with complex and acute mental health concerns.
- Local hospital Emergency Department or
### Steps

- Advise parent/carer (or parents preferred contact) to collect the young person immediately from school or of the arrangement of emergency care, as relevant. NB: The young person should not leave the school alone and should be monitored until handover to parent/carer has occurred.

### Additional Information

- GP

**WACHS:**
- Rurallink - 24-hour emergency – After hours mental health phone service for people in rural, regional and remote communities (1800 552 002).
- WA Country Health Service (WACHS) Mental Health Emergency Telehealth Service (MH ETS). Accepts Emergency Department referrals for all age groups.
- Local hospital Emergency Department or GP

**Statewide support options** available include:
- Consulting Psychologist – Suicide Prevention Statewide School Psychology Service (if school psychologist is not available) (9402 6433 or 0477 757 125).

### Non imminent risk

- If risk **not imminent**, contact parent/carer to discuss referral for further assessment. As risk is dynamic and changeable, provide parent/carer with contact details of support services available after hours.
- Refer to [resources](#) section for suggested services.

### Referral options

- GP – Provision of a Mental Health Treatment Care Plan which allows for free visits to a clinical psychologist
- Headspace
- Youth Focus
- CAMHS

### Risk Management Plan (RMP)

- The development and completion of a RMP is the responsibility of the school. If a RMP is not in place, nurses may advise the principal or student services manager of this.

### Risk Management Plan (RMP)

- As a member of the student services team, the nurse can contribute to the actions and outcomes outlined in the RMP.

### 4. Follow-up

- Ongoing care planning and follow-up is the responsibility of the school, with

### 4. Follow-up

- If appropriate, the nurse may be at a meeting reviewing the RMP with the family and DoE staff.
Steps | Additional Information
---|---
Involvement from the nurse, as appropriate.
- Nurses should follow up all actions agreed with the parent, young person and school. The rest of the follow-up is the school’s responsibility. | If appropriate, the nurse, plus DoE staff, may be one of the contact persons, on the RMP.
- If the nurse is involved in the ongoing care of a young person, and have access to a copy of the RMP, they must ensure it is the most up to date version of the document.

5. Professional Support
- Following consultation with a young person at risk of suicide, seek to debrief, as required. | Following working with a young person at risk of suicide, staff should discuss the availability of professional support and debriefing strategies with their line manager.
- For crisis situations seek debriefing as soon as possible after the event.
- Employees may seek assistance directly from the Employee Assistance Program provider.

Training
Recommended training to support this protocol is:
- Youth Mental Health First Aid
- Gatekeeper

Documentation
Nurses maintain accurate, comprehensive and contemporaneous documentation of assessments, planning, decision making and evaluations according to CAHS-CH and WACHS processes.

Appendix A: Suicide Risk Response flowchart

- For young people experiencing acute deterioration in mental state who require immediate attention, phone 000 for emergency assistance. This flowchart should not be referred to in this instance.
- This flowchart should be read in conjunction with the Suicide Risk Response protocol.
Consultation with young person in which suicidal ideation is disclosed

- Ensure adult supervision of the young person. Do not leave them alone.
- Restrict access to any suicide method.
- Inform the principal or nominated staff member and advise that a risk assessment by someone with appropriate training (Gatekeeper Suicide Prevention or equivalent) needs to be considered.
- Support implementation of existing RMP, as required.

Imminent risk

- Staff or delegate to contact parent/caregiver.
- Immediate referral options include: Emergency Department, client's mental health care provider or CAMHS ETS/Rurallink.
- Complete clinical handover (written, if time allows).
- Arrange parent/caregiver to collect the young person, or if relevant, arrange emergency care.
- Contact Line Manager if unsure.

Non-Imminent risk

- Staff or delegate to contact parent/caregiver to inform them of risk, discuss actions, referral options and support services available.
- Involve others as appropriate, e.g. nominated school staff member.
- Refer to appropriate services as required.
- Complete clinical handover if referral occurs.

Document summary of risk assessment, plan of action and other relevant information in clients health record

- Follow-up agreed actions in care plan.
- Obtain an updated copy of the RMP for the clients health record

Debrief with Line Manager or seek professional support
