| Scope (Area): | NICU KEMH, NICU PCH, NETS WA |

Child Safe Organisation Statement of Commitment

CAHS commits to being a child safe organisation by applying the National Principles for Child Safe Organisations. This is a commitment to a strong culture supported by robust policies and procedures to reduce the likelihood of harm to children and young people.

This document should be read in conjunction with this [disclaimer](#)

Aim

Outlines the review, development and endorsement process for clinical guidelines in the Neonatology Unit.

Risk

Inaccurate or ineffective reviews can result in processes that do not align with best practice which may result in poor patient outcomes.

Background

Clinical Guidelines are developed to guide staff on practice and standards of care in the neonatology unit. The clinical guidelines are utilised by Nursing, Medical and Allied health staff across the Neonatology Unit, Postnatal Wards at KEMH and the Newborn Emergency Transport Team.

Key points

- There are five policy sets that fall under Neonatology.
 1. Neonatology Clinical Guidelines
 2. Newborn Emergency Transport Service (NETS) WA Guidelines
 3. Neonatal Postnatal Ward Guidelines (KEMH)
 4. Nutrition Room Guidelines
 5. COVID-19 Neonatology Guidelines
- Clinical Guidelines are reviewed every three years at a minimum.

- Review processes and changes to content can be initiated through evidence-based practice
 - Clinical Audits
 - New Evidence from research or literature reviews
 - Recommendations from clinical incidents or Root Cause Analysis
 - Change in equipment availability or new equipment
- Clinical Guideline reviews, endorsement process and communications are coordinated by the Clinical Nurse Specialists – Quality and Safety.
- All clinical guidelines complete a robust review where medical and nursing staff are given the opportunity to review the content before it is endorsed and published.

Document Development

- Refer to [Appendix 1](#) for Guideline Review/Development Workflow.
- Guideline submission form accompanies all reviews ([appendix 2](#)) and must be completed by reviewer.
- All clinical guidelines are presented on the approved CAHS Guideline/Policy Templates.
- Associated guidelines are hyperlinked for ease of access.
- Medication monographs landing page to be hyperlinked where staff can search the medication required – medication dosages are not to be added to guidelines.
- Stakeholder review must be completed with each guideline review where appropriate.
- FiCare Principles incorporated where appropriate.
- Aboriginal Impact Statement to be completed by CNS Guidelines and Safety.
- Place card developed for HealthPoint.

Document Distribution

Once endorsed, the following is to occur:

- Previous guideline archived and new document saved in policy set.
- Clinical Guideline uploaded to CAHS internet site.
- Place card uploaded to Healthpoint with CAHS.NEO. as naming configuration
- Hard copies printed, 1 per site
 - PCH resource cupboard

- KEMH SCN3 nurses' station
- List of reviewed guidelines circulated to the following
 - Emailed to all neonatology staff with key changes
 - Add to CAHS Monthly Policy Summary ([CAHS Policy Update Page](#))
 - Posted on Neonatology Staff Portal
 - Notification of endorsement to key stakeholders

Implementation

Some clinical guideline reviews may result in change of practice. Several practices may follow to ensure staff are aware of the changes and to evaluate the effectiveness of the change.

- Change of Practice Notification
- Take 5 and education presentations (in-service)
- Nursing Updates
- Quality Improvement Activity following new implementation
- Simulations
- Feedback forms
