

# Midland Community Hub Project

1 December 2020

Issue 2

## Welcome

Welcome to the second issue of the Midland Community Hub Project e-newsletter.

Here are the key points from the first issue, if you missed it:

- The Midland Community Hub will bring local child health services together into a purpose-built facility.
- Bringing services together will improve access, especially for families who access multiple services as they will all be in the same place.
- The hub will be the first of its kind in WA so we need ongoing feedback from the Midland community to ensure it meets the needs of local families.

The entire first issue is available on our [website](#).

## Thank you for your feedback

In an online survey and face-to-face workshops earlier this year, the Midland community gave us valuable feedback that has helped shape the planning of the hub:

### We heard from

**498**

parents and  
carers

**13**

young  
people

**22**

child health  
organisations

**15**

Aboriginal  
community  
members

## You told us you want the Midland Community Hub to be

Close to Midland Public Hospital or shopping centre

Close to public transport and free parking

Child, youth and family friendly

Near outdoor recreation

Welcoming to kids with varied developmental needs

Incorporate Aboriginal cultural elements

### What's next?

As planning for the Midland Community Hub progresses we will be looking for community members and service providers to help us shape various aspects of the project, from the physical design of the building to the end-user experience.

In future issues of this e-newsletter we will have more information about how you can get involved on an ongoing basis if you are interested.

---

### Location, location

We've done a land and property search in the Midland area and are working to confirm a location for the hub. We will let you know the location when it is finalised.
